

# Creating Accessible Microsoft Word 2013 Documents (Windows)

## Heading Styles

Create a uniform heading structure through use of styles in Word. This allows screen readers to navigate a document and improves accessibility for everyone.

### Adding and Editing Headings

1. Select the text and **choose the appropriate style** under **Styles** on the **Home** ribbon. (e.g., "Heading 1")
2. Headings 1, 2, or 3 can also be assigned using **CTRL + ALT + 1, 2, or 3**, respectively.

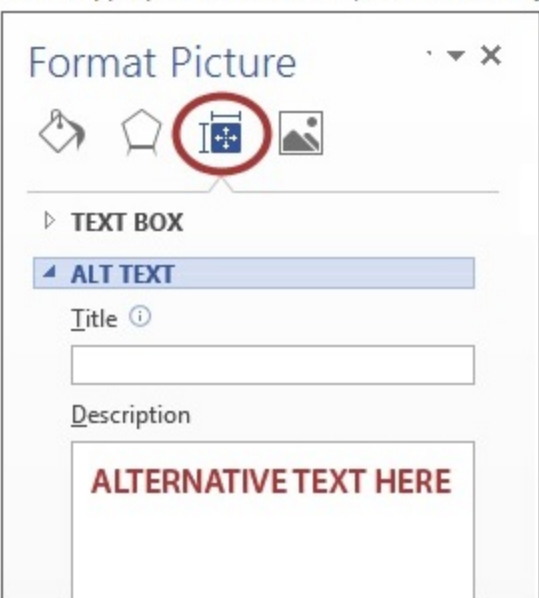

## Alternative Text for Images

Images can be given appropriate alternative text in Word. This alt text is read by a screen reader in a Word file and should remain intact when exporting to HTML or PDF.

### Adding Alt Text

1. Right-click on the image and choose **Format Picture**.
2. Select the **Layout & Properties** icon and choose **Alt Text**.
3. Enter appropriate alt text only in the **Description** field (not the **Title** field).

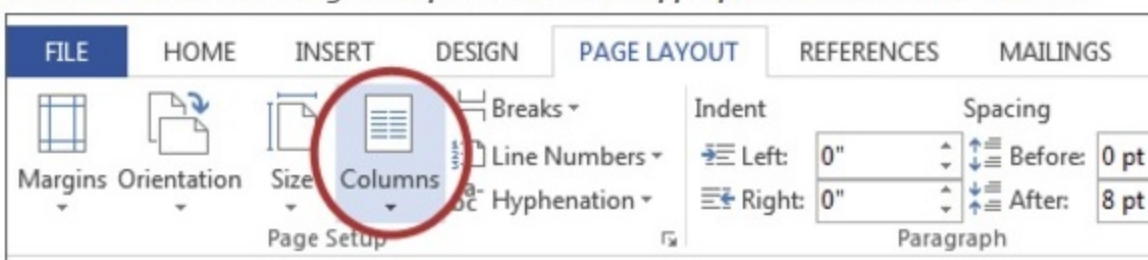

## Columns

When creating columns, **always use true columns**, not columns created by hand with the **Tab** key.

### Creating Columns

1. Select **Page Layout** on the ribbon.
2. Select **Columns** under **Page Setup** and choose the **appropriate number of columns**.

## Lists

Use **true numbered and bulleted lists** to emphasize a point or a sequence of steps.

### Creating Lists

1. Select the **Numbered List** or **Bulleted List** option on the **Home** ribbon, under the **Paragraph** section.

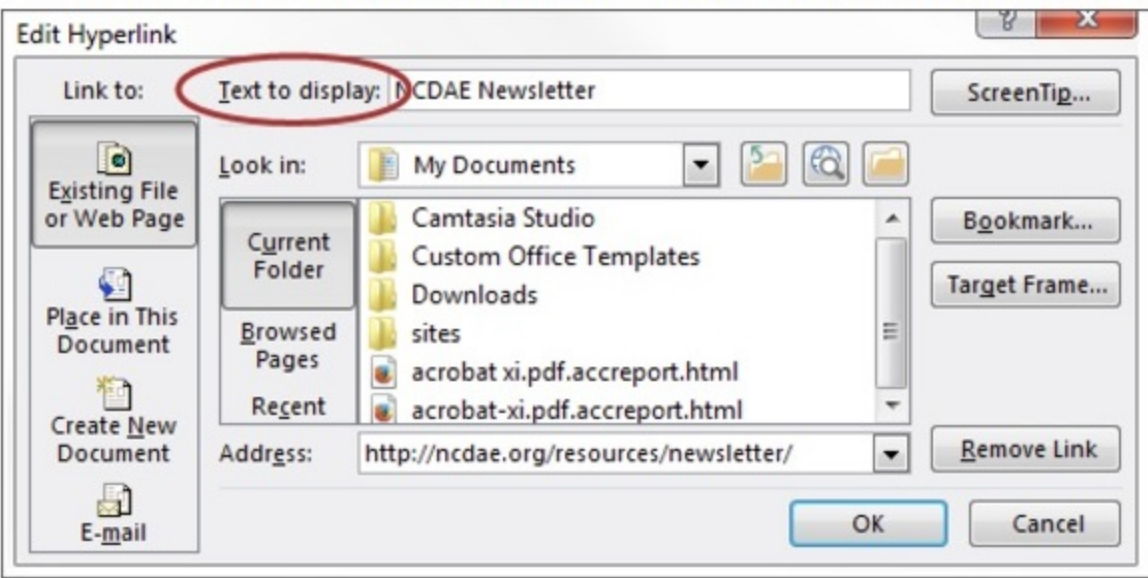

## Links

Word **automatically creates a hyperlink** when a user pastes a full URL onto a page. These may not make sense to screen reader users, so **more information is needed**.

### Adding Hyperlinks

1. Select the text you want linked, right click, and select **Hyperlink** or **CTRL + k**.
2. Make sure the text in the **Text to Display** field is a meaningful description and type the link URL in the **Address** bar.

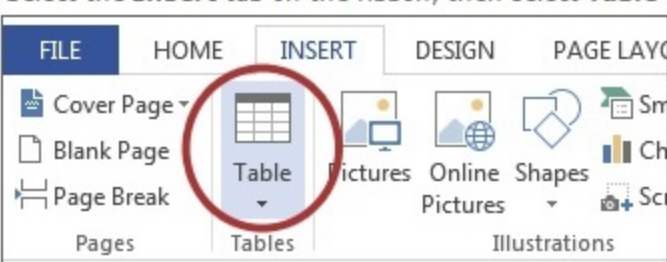

## Data Tables

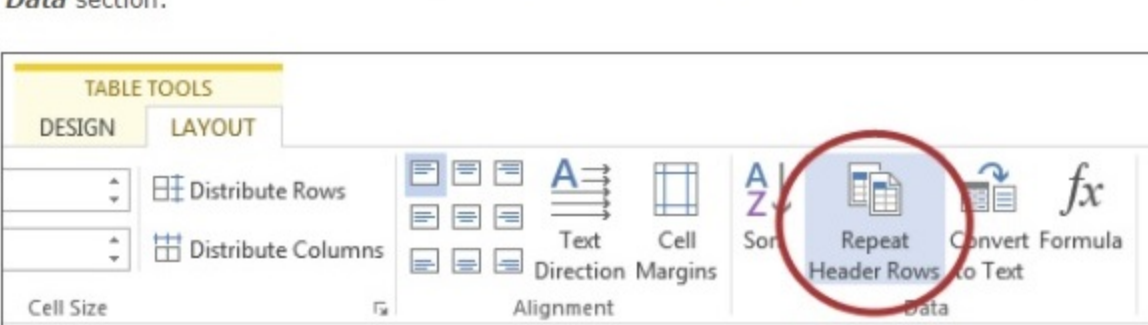

Accessible tables need a **clear table structure** and **table headers** to help guide a screen reader user.

### Creating Tables

1. Select the **Insert** tab on the ribbon, then select **Table > Insert Table**.

2. To add table headers to the first row, select **Table Tools > Layout** on the ribbon, then choose the **Repeat Header Rows** option in the **Data** section.

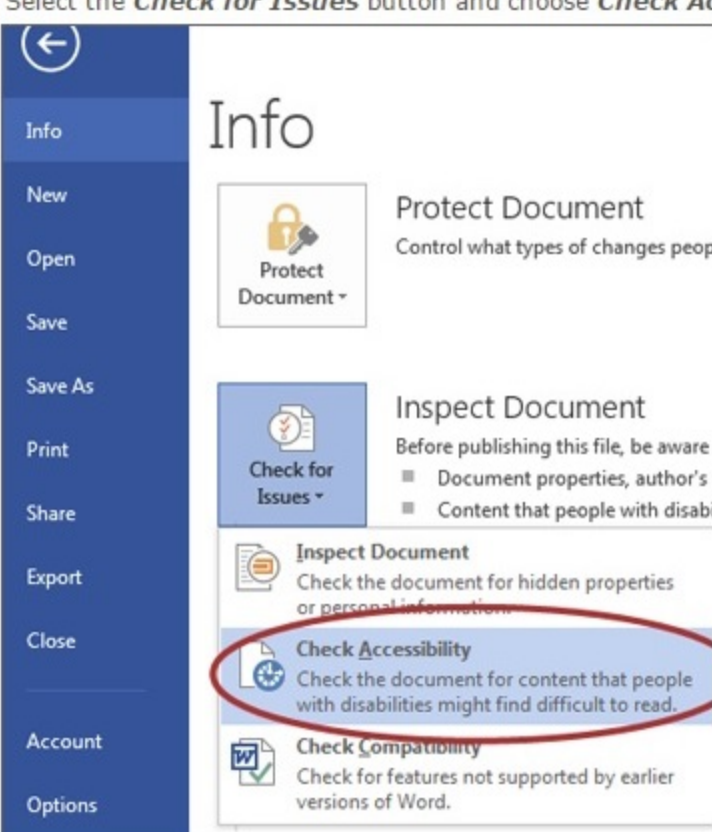

Options in the **Design** tab may be used to change appearance but will not provide the necessary accessibility information.

## Accessibility Checker

Word includes an accessibility resource that **identifies accessibility issues**.

1. Select **File > Info**.
2. Select the **Check for Issues** button and choose **Check Accessibility**.

3. The Accessibility Checker task pane will show **accessibility errors, warnings, and tips** on how to repair the errors. Select specific issues to see **Additional Information** at the bottom of the task pane.

## Other Principles

- Ensure that font size is sufficient, around **12 points**.
- Provide **sufficient** contrast.
- Don't use color **as the only way** to convey content.
- Provide a **table of contents** for long documents.
- Use **simple** language.
